NASA

In Greek mythology, were the children of the earth mother Gaia and the sky father. So when the young gas giant went on a rampage through the inner solar system, it shaped the fate of everything in its path. Data collected by Cassini suggests that Saturn no longer consists of a rocky core surrounded by a vast atmosphere, but rather it is a single object with no distinct boundaries.

Saturn Got Its Tilt From Its Moons

But the long era of the four terrestrial planets will be over, the lives lived on one of them, nothing more than a distant memory. CAROLYN PORCO: It became clear, once we had found the plume, that we needed to get as deep into it as possible.

Overview

How would be able to exist or flourish during its time in the Saturn Configuration or if it was captured by a brown dwarf star? With a diameter of 396 km and a mass of 0.

Saturn • Facts and Information on the God Saturn

.

Saturn Facts

Was it always this way? It is not the only planet to have rings—made of chunks of ice and rock—but none are as spectacular or as complicated as Saturn's. One theory states that they were once larger moons that were smashed to tiny pieces by comets or meteorites. In contrast to the length of its day, Saturn has a very long year.

StarChild: The planet Saturn

Since that time, however, very few other features have been reported.

Exploration

Titan could be wet, not with water, but with liquid methane. The most dramatic recurring feature observed on Saturn is its Great White Spot. And you have to check out every wire.

Overview

Indeed, the F ring, which was discovered by the Pioneer 11 in 1979, shows some remarkably complex structures, with the ring being made of several interlaced and apparently braided particle strands. And so what is done is we use flybys past other planets.
