It bubbles just underneath the surface, like the hot August sun on fresh Mississippi blacktop.

What's Left of Birmingham: Red Iron Ore Mine

Langford did not discuss how much it would cost or where the funding would come from, but he called it an economic development tool because more companies would be likely to come to Birmingham if they knew it had a healthy future work force. He argues against fear of such deities by demonstrating, through observations and arguments, that the operations of the world can be accounted for in terms of natural phenomena. The big concern is global PC demand.
