## Resident fish habitat management strategy for Wyoming (1994 edition)

Resident fish mitigation agreements should be permanent or span multiple years and be long-term in duration.

## Habitat

Rationale Mitigation is required for native resident fish and other freshwater species impacted by the construction and operation of the hydropower system. Our goal is to protect and restore migratory and resident fish species and their habitat in the rivers of New Hampshire, Massachusetts, Rhode Island, Southern Maine and Southeastern New York.

## Resident fish habitat management strategy for Wyoming (1994 edition)

Through the , excise taxes for fishing equipment, motorboat fuel, sporting arms, ammunition and archery equipment provide the funds essential to the conservation efforts of wildlife and sport-fish management agencies. Wells Hydroelectric Project FERC License No. License Purchases Make Conservation Possible Without the purchases of licenses by hunters, trappers and anglers, and the taxes derived from the sale of sporting equipment and fuels for boating, the conservation of fish and wildlife would not be possible.
