Resources

The researcher informed the teacher and asked for participation after parents had agreed on doing so and the teacher signed informed consent as well. Before applying the SST, all therapists participated in a training in the specific protocol. We expect that comparing the two treatment conditions yields lower values of difference.

Skills Training for Children with Behavior Disorders: A Parent and Therapist Guidebook by Michael L. Bloomquist

A comprehensive evaluation by a mental health professional may be needed to get the right diagnosis. The purpose of the SST for children is to learn to interact with other children and to experience that interacting with other children can be fun. Natenshon Obsessive-Compulsive Disorder Freeing Your Child from Obsessive-Compulsive Disorder: A powerful, practical program for parents of children and adolescents By Tamar E.

Skills Training for Children with Behavior Disorders

Barbara van den Hoofdakker, Lianne van der Veen, Sjoukje van Warners, and Leonieke Vet. Informed consent When an SST was indicated, the therapist introduced this form of treatment to the parents and children and informed them about the study.

A randomized controlled study of a social skills training for preadolescent children with autism spectrum disorders: generalization of skills by training parents and teachers?
