Michigan's Governor would cause Regional Energy Crisis in Canada

It is therefore primarily as a result of geography, rather than geology, that questions concerning the importation, export and particularly the transportation of energy have preoccupied energy policymakers. The carnage is everywhere, beginning in the industry itself — where jobs and opportunities are disappearing — and rapidly working its way into capital markets, where energy is in freefall and billions are being lost.

Michigan's Governor would cause Regional Energy Crisis in Canada

The recession also lasted from 1973 to 1975 in the.

Report warns global energy crisis looming without increased oil and gas investment

This goes against policy objectives, as energy demand forecasts show continued reliance on fossil fuels for some time to come. The expansion has presented ecological problems that experts thought they would have decades to resolve.

The 1970s Energy Crisis: Chaos Yesterday vs Today

The overriding objective of Canadian energy policy for the next 20 years was to stimulate the growth of the domestic. These challenges are described below.
