NMA is the responsible agency with survey and mapping to deal on the technical part of producing the cadastral map.

GIS in land administration

A cadastre is an information system consisting, a series of maps or plans showing the size and location of all land parcels, together with text records that describe the attributes of the land. Thus, the law must constantly be reviewed to identify the necessary changes. Carry out such other duties as directed by the Minister of Natural Resources and Environment.

GIS in land administration

Pursuant to the provisions of section 438A, the Federal Territory Modification of National Land Code Order 1974 with effect from 1 February 1974 made provision for the National Land Code to apply in the Federal Territory subject to appropriate amendments thereto.

Cadastre and land information management in Malaysia. (1990 edition)

The Malaysian Parliament had been dissolved on March 20, 1969 in anticipation of a general election to be held on May 10, 1969.
