## Oldham Local Studies & Archives

The Peckforton diagram shows a more consistently wooded landscape than that from Hatchmere, with arboreal species, particularly alder, dominant throughout the record. A 2015 petition called for Wigan to apply for independence from Greater Manchester and rejoin Lancashire because of its heritage and location.

## North West England

His work illustrates the key links between archaeological sites in their contemporaneous landscape settings and studies of changes in relative sea levels. Late Upper Palaeolithic Creswellian Point from Rochdale area, Greater Manchester Similarly, re-examination of cave assemblages has produced new information from old archives. There is an established tradition of surface artefact collection, mainly focussed upon upland peat environments, and individuals or local archaeological societies undertake much of this work.

## North West England

These date from various periods during the Mesolithic. Mature woodland, scrubland, grassland, high moorland, mossland, agricultural land, lakes, wetlands, river valleys, embankments, urban parks and suburban gardens are habitats found in Greater Manchester which further contribute to biodiversity. Whilst large-scale and regional changes in climate remain of direct interest to studies of populations, settlement patterns and economic regimes, most site-specific palaeoenvironmental studies focus on the effects of people in their local landscapes, and on disentangling these from ecological developments.

## Oldham Local Studies & Archives

Dates from these burnt mounds show a long period of continual or intermittent use spanning almost one and a half millennia reaching from the Late
