The new GPU uniform is to distinguish the RNZAF from NZ Army personnel of which there tended to be some confusion from the general public due to the same DPM uniform being worn.

T

There are however several features common to all upgraded T-72BA models; the frontal hull floor plate was reinforced against mines, the driver's seat is now suspended from the ceiling instead of being fixed to the floor and the driver's station has a new steering system as well as a new TVN-5 night sight. Woodbourne was the first base to make the change, synchronised with a routine change of command; Ohakea and Auckland followed.

Protection is enhanced with the use of Nozh ERA tiles on the turret while retaining the Kontakt-1 tiles on the hull however Nozh tiles are compatible with Kontakt-1 mounting points and can be retro-fitted.

T

Later at joined the organisation. A fourth squadron planned for Dunedin had not been raised even by July 1939. As part of the same reorganisation, the headquarters of was disestablished, and , Air Movements, Aviation Refuelling, RNZAF Rescue Fire, Base Medical Flight, Survival Training Centre and other sub-units reassigned into what is now known as Operations Squadron.
