-

3

Nutrition in primary care ; Nutrient and drug interactions

Notes: Bibliography: p. 26-27.

This edition was published in 1980

Filesize: 44.77 MB

Tags: #Medication #Interactions: #Food, #Supplements #and #Other #Drugs

## Nutrient

Induction or inhibition of enzymes in the gut by nutrients may lead to a significant change in oral bioavailability of drugs or vice versa.

## Nutrient drug interaction

Licorice: This would appear to be a fairly harmless snack food.

## Medication Interactions: Food, Supplements and Other Drugs

Patients should be advised not to exceed 4 g of acetaminophen in 24 hours and consult their physician if they regularly drink three or more alcoholic drinks per day.

## Food

This may cause the drug levels to go down or go up more than expected.

## Drug Interactions: Alcohol, Food, and More

Further, drug labels may change as new information becomes known.
