Photography

Without special , the result would simply be three superimposed black-and-white images, but cyan, magenta, and yellow dye images were created in those layers by adding during a complex processing procedure. The of photography is a matter that continues to be discussed regularly, especially in artistic circles. The invention of the camera can be traced back to the 10th century when the Arab scientist Al-Hasan Ibn al-Haytham alias Alhacen provided the first clear description and correct analysis of the human vision process.

Photography

Protection of photographs is typically achieved through the granting of or moral rights to the photographer.

Photography

Glamour photography is popular in advertising and. Autochrome incorporated a color filter layer made of dyed grains of , which allowed the three color components to be recorded as adjacent microscopic image fragments. Although the convenience of the film greatly popularized amateur photography, early films were somewhat more expensive and of markedly lower optical quality than their glass plate equivalents, and until the late 1910s they were not available in the large formats preferred by most professional photographers, so the new medium did not immediately or completely replace the old.

Photography

Only the two men near the bottom left corner, one of them apparently having his boots polished by the other, remained in one place long enough to be visible.
