### Expense, social and moral control. Accounting and the administration of the old poor law in England and Wales

Records to which the public does not have statutory right of access are not open to public inspection until the records in question are more than 30 years old, unless the enquirer presents written authority from the Parish Council allowing access.

### Expense, social and moral control. Accounting and the administration of the old poor law in England and Wales

In 1772 the cost reached the £100 level and from then until 1782 it remained fairly stable between £100 and £120 a year. After this it varied between £280 and £480, the peak year being 1819-20. An examination of these discourses during the first third of the 19th century reveals contemporary perceptions of the purposes of accounting in local governance structures.

Even in parishes that managed their own workhouse, or contracted out part of their relief obligation to a private workhouse, paupers were frequently allowed to live independently and were given a limited pension. Some information about how this system worked in practice in the early 1830s can be derived from the notes to R1838 and from the report of Major Wyke, an assistant poor law commissioner. The small average size of the families suggests that a high proportion of those assisted were elderly or infirm people living alone or as lodgers.
