Strategic planning

As a result, anticipating or reacting to changing consumer needs may be difficult. In light of the many troubling events in the business world lately, we felt that a discussion of ethics was especially important. Conclusion It could be argued that the notion of the learning organization provides managers and others with a picture of how things could be within an organization.

Organization Theory

Further, various sub-systems are arranged according to a scheme so that the complete system is more than just a sum of its parts. We must, in other words, become adept at learning.

Second, while the building blocks of systems theory are relatively simple, they can build into a rather more sophisticated model than are current in many organizations. By contrast, defining the term is easy and unproblematic. It is especially in times of high levels of change that strategic planning places an organisation in a more agile state, a stated of 'preparedness', more attuned to market and other external conditions and therefore the better prepared to flex or even substantially change their strategic thrusts and operational plans at local as well as at higher levels when fundamental, sometimes structural economic, political and social change occurs.
