The Middlegate Formation Fossil Flora Locality, Nevada

Mammalian Paleontology of the Monarch Mill Formation at Eastgate, Churchill County, Nevada. Lots of fossils can be found there, including silicified brachiopods, trilobites, nautiloids, echinoderms, bryozoans, ostracodes and conodonts. All the fossil sites fall within the physiognomic space defined by the Physg3brc dataset showing the versatility of this calibration for Paleogene to Present sites in North America.
