And along the way, the book covers such intriguing topics as how computers have altered our thought habits, how we will be able to distinguish virtual from real reality, and the appearance of virtual reality in popular culture as in Star Trek's holodeck, William Gibson's Neuromancer, and Stephen King's Lawnmower Man. And just around the corner lurks full-blown virtual reality, in which we will be able to immerse ourselves in a computer simulation not only of the actual physical world, but of any imagined world.
