

Dynamic resource allocation for multimedia services in mobile communications environments

- - Dynamic cloud resource management for efficient media applications in mobile computing environments

Description: -

-Dynamic resource allocation for multimedia services in mobile communications environments

-Dynamic resource allocation for multimedia services in mobile communications environments

Notes: Thesis (M.Sc.) - University of Surrey, 1996.

This edition was published in 1996

Dynamic Resource Management and Automatic Configuration of Distributed Component Systems1

An example is illustrated in , which contains a mapping of a three-task DAG to a four-node network. Thus, Greedy is re-run at each time when an urgent task re-allocation is required. .

Optimal multi

MLA Vakilinia, Shahin, Dongyu Qiu, and Mustafa Ali. The MC-CDMA and OFDMA systems can support a highly adaptive and efficient medium access control protocol to optimize system resources while supporting large variety of applications.

Analytical Modelling of a New Handover Algorithm to Improve Allocation of Resources in Highly Mobile Environments

Hence, all nodes have a fixed communication range, and they are connected via multi-hop links. For the reason, the cross-layer design was devised by considering interaction between APP and PHY layers for the purpose of resource allocation for practical video streaming service in WiMAX environment.
