Eur J Clin Nutr 2002, 56:245—51. The pharmacists who trained the GPs also reported good interaction particularly in face-to-face training, which encouraged greater participant engagement and reached more GPs. Withdrawal versus continuation of long-term antipsychotic drug use for behavioural and psychological symptoms in older people with dementia.

A cluster randomised feasibility trial evaluating six

Residents are asked to consent to this. Malnutrition is related to functional impairment in older adults receiving home care.

Medication review plus person

How Useful Is Body Mass Index for Comparison of Body Fatness across Age, Sex, and Ethnic Groups? J Nutr Health Aging 21, 370—380 2017. The average intake will be calculated from a three non-consecutive records at 3 and 6 months.

Feasibility of Quality Indicators for the Management of Geriatric Syndromes in Nursing Home Residents

This paper focuses on feasibility, including recruitment and retention, implementation of medication change recommendations and the experiences and expectations of care staff. Little is known about the effectiveness of interventions aimed at improving their dietary intake and nutritional status, nor about the determinants of successful implementation.

Feasibility assessment and implementation strategies of green care in rural Taiwan

Feasibility assessment and implementation strategies of green care in rural Taiwan

Randomisation took place at the care home level, using a computer-generated random number list to allocate each home to either a dietetic intervention arm food-based or prescribed supplements or the standard care arm, continued for 6 months. For example, we identified and addressed HCP barriers related to endorsing exercise and providing behavioural support to men on ADT.

Feasibility assessment and implementation strategies of green care in rural Taiwan

Despite the imposition of lockdown for the COVID-19 pandemic, referral rates into and adherence to, the intervention was high. Nutrition
Burbank, Los Angeles County, Calif.

Market and Feasibility Studies

. Following phase 1, the quantitative findings will be further explored with a sample of residents and care home staff, using semistructured interview and focus group techniques.
