Studies of Mn(II), Co(II), Ni(II) and Cu(II) Chelates with 3

The organic layer was dried over magnesium sulfate followed by removal of the solvent.

Practical Heterocyclic Chemistry

The inclusion of more advanced and current material also makes the book a valuable reference text for postgraduate taught courses, postgraduate researchers, and chemists at all levels working with heterocyclic compounds in industry.

Natria trikloroacetato

The solvent was again removed and the last step repeated with cyclohexane.

Synthesis of isatin

The subsequent chapters deal with recent advances in the field of heterocyclic chemistry arranged by increasing ring size and with emphasis on synthesis and reactions.
