ASA: 5 Big Reasons Why WISHH's Work Matters Right Now

Dixon Massachusetts Institute of Technology 1715 Cannon Crescent Cambridge, Massachusetts 02139 Ottawa K20 OZ3, Ontario, Canada USA Kenneth W. Currently, WISHH leads the USDA-funded Commercialization of Aquaculture for Sustainable Trade CAST — Cambodia project and is working with African aquaculture entrepreneurs, as well.

Impact of fortified blended food aid products on nutritional status of infants and young children in developing countries

Soy Protein and Human Nutrition.

Marketing supplementary food products in LDCs: A case study in Morocco

Abbreviations: LMIC, low- and middle-income country; SSB, sugar-sweetened beverage Provenance: Commissioned; not externally peer reviewed. For maize specifically, consult Villegas and Mertz 2.

Impact of fortified blended food aid products on nutritional status of infants and young children in developing countries

Because growth in profit is the primary goal of corporations, self-regulation and working from within are doomed to fail. Public health professionals must place as high a priority on nutrition as they do on HIV, infectious diseases, and other disease threats. Nutrition is the science that interprets the nutrients and other substances in food, in relation to maintenance, growth, reproduction, health and disease of an individual.

Cereal grain health benefits as a functional food

Comflakes are also a popular cereal globally. In Western countries private luxury—products or services only a few know about—is coming of age.

Food, Policy Options For Tackling Protein Energy Malnutrition In Nigeria

It is recognized in plant breeding that rapid, large-scale screening techniques may result in the discarding of some lines with possibly useful characteristics. Released July 13, the joint from the Organisation for Economic Co-operation and Development OECD and Food and Agriculture Organization FAO of the United Nations also finds growth in feed consumption is mainly due to the ongoing expansion of livestock herds and aquaculture production in low and middle-income countries. We can live without tobacco, but we all must eat.

ASA: 5 Big Reasons Why WISHH's Work Matters Right Now

What people eat is increasingly driven by a few multinational food companies.
