### Geography

But it should be borne in mind that development relates to all parts of the world at every level, from the individual to the global.

### Geographies of Sustainable Development, Master's, 2 years

Transport carries an important social and environmental load, which cannot be neglected. Total number of countries that have reached their HIPC decision points and number that have reached their completion points cumulative HIPC 43. Another line of criticism suggests that so-called development is associated with the dependency of poor countries on richer nations, and the maintenance of forms of economic, social, political and cultural subordination.

### Finance & Development, December 2008

Subsequently, following the apparently worldwide demise of socialism, the classification has regressed to an entirely income-based one. But the emerging Third World was not quite the same as it is today; many countries had still to gain their independence and Latin American countries were not present in Bandung.

### Geography

While initial infrastructure investments tend to have a high return since they provide an entirely new range of mobility options, the more the system is developed, the more likely additional investment would lower returns. A corollary of this widespread agreement on the inevitability of regional uneven development, however, is that a variety of approaches to understanding and explaining regional uneven development have been constructed, some of which are compatible and complementary, others which are competitive and incompatible.

### Overview of Human Geography: Development

Analysis of current data sets show three significant implications of geography on developing nations. Low HDI scores are returned by Pakistan, Haiti, Tanzania, Senegal, Guinea, Rwanda, Niger, Sierra Leone and Burundi.
