The role of the nurse in health promotion

Department of Health and Human Services 2010.

What Does an Adult Geriatric Nurse Practitioner Do?

Public health nurses can acquire important knowledge, competencies, and skills to promote and protect the health of communities and populations by understanding and applying CBPR approaches. Definition Urinary incontinence UI is any involuntary leakage of urine.

Pad per day usage, urinary incontinence and urinary tract infections in nursing home residents

Nurses Role in Health Promotion for Patients Nurses' role in health promotion has a high rate of success since they work in various settings and interact with people from different cadres.

Nurses can make a difference: caring for those living with dementia

One study found that 74% of Spanish-speaking patients have less-than-adequate health literacy as compared to 7% of English-speaking patients.

Maintaining skin health in older people

At an advanced level, PHN knowledge and competencies prepare nurses to take a leadership role to assess assets and needs of communities and populations and to propose solutions in partnership. As the population continues to mature — the need for effective, qualified geriatric nurse practitioners will increase accordingly.
