CHAPTER 1 REVIEW OF THE LITERATURE CONCERNING NEUROLOGICAL COMPLICATIONS TO CAROTID ENDARTERECTOMY AND THE MEASURES TAKEN TO PREVENT THEM, *Acta Neurologica Scandinavica*

TRANSSPHENOIDAL APPROACH - Operative method of reaching the pituitary gland or skull base traversing the nose and sinuses. Lateral — Situated away from the midline of the body.

Contribution to the anatomical nomenclature concerning lower limb anatomy

Sterilization — The method used to render a material free from living organisms. Iliac Crest — The large, prominent portion of the pelvic bone at the belt line of the body. The doctrine of terms; a theory of terms or appellations; a treatise on terms.

Contribution to the anatomical nomenclature concerning lower limb anatomy

Spine — The flexible bone column extending from the base of the skull to the tailbone.

List of Neurology Abbreviations and Acronyms in Medical Category

In this paper we argue that CHI studies span a wide spectrum of benefit and risk, and that some CHI studies may involve minimal risk. Here, we show that the YAP1 gene fusions YAP1-MAMLD1, YAP1-FAM118B, YAP1-TFE3, and YAP1-SS18 are oncogenic in mice.

Glossary of Spinal Terms

This is roughly equivalent to the prevalence of down syndrome. There are no published series to date evaluating safety and efficacy of VSS in pediatric patients. Spinal Column — See Spine.

Contribution to the anatomical nomenclature concerning lower limb anatomy

End Vertebra — 1 The most cephalad ie, toward the head vertebra of a curve, whose superior surface tilts maximally toward the concavity of the curve. Respirators that meet these criteria include air-purifying respirators with organic vapor cartridges. CART-19 cells deplete normal B cells but

at the dose tested in these 3 subjects did not improve CART-Meso cell persistence.

Gait Abnormalities

Furthermore, the neurological terminology pertaining to the examination is fully explained, allowing one to communicate the results of the exam to fellow medical personnel or to the medicolegal record.
