### On the scientific status of cognitive appraisal models of anxiety disorder

Appraisal theory is the theory in that are extracted from our evaluations appraisals or estimates of events that cause specific reactions in different people. In recent years, several meta-analyses have been conducted to quantitatively review the evidence of CBT for anxiety disorders, each using different inclusion criteria for studies, such as use of control conditions or type of study environment.

### An appraisal of rational

The two main theories of appraisal are the structural model and the process model.

### Behavioral diagnosis: A practical approach to patient education

Average odds ratios of acute treatment response to cognitive-behavioral therapy as compared with placebo.

### Appraisal theory

Social cognition and social perception. This finding enables psychologists to be able to begin to predict the emotion that will be elicited by a certain event and may give rise to an easier way to predict how well someone will cope with their emotion. From the reasoning of the arousal, you are then able to have an emotion.
