The Future of Healthcare Design

Videoconferencing technologies along with health insurance providers that are open to exploring remote care models are accelerating the trend.

Why Design Is Critical to Health Care's Future

They reflect general insight and may present potential options for consideration based on currently available information, which is inherently uncertain and subject to change, but do not contain all of the information needed to determine a future course of action. Will there be high-tech full body scans, an iPad in the hand of every practitioner, and hologram versions of yourself being beamed into the homes of your patients? The healthcare response to COVID-19 will remain a priority for an anticipated 18 to 24 months, as countries implement phased relaxations and restrictions to suppress the virus, expand testing and treatment capacity, and find better therapies. We take students during their first year of medical school, and we teach them design methodology.

Some of these shifts were underway before the pandemic was declared and likely will now be accelerated. Beyond the physical flexibility of individual areas, the operational adaptability of a space will be more crucial.

The Art and Science of Healthcare Design

We started in 1993 as a team of forward thinkers with a vision for creating healthcare facilities that promote healthier environments for patients and staff. Mike Hrickiewicz is the editor of Health Facilities Management.
