

# Depositional Study of the Harbour Seam, Sydney Coalfield, Nova Scotia.

s.n - Petrography and depositional environment of coal seams in the Carboniferous Morien Group, Sydney Coalfield, Nova Scotia

Description: -

-Depositional Study of the Harbour Seam, Sydney Coalfield, Nova Scotia.

-

College of Aeronautics report -- no.8804  
1989-13

Memo (Aarhus universitet. Økonomisk institut) ;  
1989-13

Memo / Økonomisk Institut,  
Paper (Geological Survey of Canada) -- 65-15  
Depositional Study of  
the Harbour Seam, Sydney Coalfield, Nova Scotia.

Notes: 1

This edition was published in 1965

This publication is concerned with perhaps the most important field of coal research, that of coal environments. Catalogue Persistent Identifier  
APA Citation Hacquebard, P. Petrographically, a normal, banded bright coal is represented, consisting of alternating bands of vitrite, clarite, clarodurite, durite and fusite.

**A depositional study of the Harbour Seam, Sydney Coalfield, Nova Scotia**

The geochemistry is marked by much higher hi values than normally reported for coals but other indices are typical for coals of this rank.

**Petrographical, palynological and geochemical analyses of the Hub and Harbour seams, Sydney Coalfield, Nova Scotia, Canada—implications for facies development**

Get Pleistocene Recent Stratigraphy Evolution and Development of the Apalachicola Coast Florida Books now! Classification schemes are used to provide a systematic arrangement of materials. This has resulted in an increase in rank with depth, as well as regionally from west to east within the same seam. The database is searchable by many of the standard numbers associated with books, magazines, journals, and music and video recordings.

**Petrographical, palynological and geochemical analyses of the Hub and Harbour seams, Sydney Coalfield, Nova Scotia, Canada—implications for facies development**

All coal of the Sydney field is classed as high volatile A bituminous, but there are significant changes within and beyond this category.

**The Sydney coalfield of Nova Scotia, Canada**

Features electronic supplements, such as photographs, diagrams, tables, flowcharts and links to other websites Includes in-depth illustrations with diagrams, flowcharts and photographic plates many in color for enhanced utility , tables and graphs. The Classify prototype is designed to help users apply classification numbers. We cannot guarantee that A Depositional Study Of The Harbour Seam Sydney Coalfield Nova Scotia book is available.

**Depositional Study of the Harbour Seam, Sydney Coalfield, Nova Scotia. (1965 edition)**

Petrographic compositions of the seams are very similar with high vitrinite content, low inertinite, moderate liptinite and negligible clastic mineral content. The systematics and distribution of Permian miospores. This book written by P.
