Wildlife

Rampant poaching for the exotic pet trade is devastating animal populations worldwide. Animals and people are most commonly infected through bites from rabid animals. Wild and domestic carnivores especially cats can also become infected by eating infected rodents.

San Diego Zoo Safari Park

We are still learning about this virus, but it appears that it can spread from people to animals in some situations, especially after close contact with a person with COVID-19. He owns Panhandle Exotics, a pet store in Pensacola, Florida. Rocky Mountain spotted fever RMSF is a bacterial disease transmitted to dogs and humans by ticks.

Owning Wild Animals: Stats on Exotic Pets (Infographic)

We also provide disinfecting and sanitizing along with excellent customer service.

Owning Wild Animals: Stats on Exotic Pets (Infographic)

Thanks to social media, interest in exotic pets has skyrocketed in recent years.

FWC outlines tips to keep pets, wildlife safe from coyotes

Histoplasmosis is a fungal disease that is spread to people by breathing in dust from pigeon or bat droppings.

Pet and Wildlife

If the infection spreads from the skin to deeper tissues, arthritis or more serious signs of illness fever, weakness, muscle aches, headaches, etc. Check out this story on USATODAY.

Pet and Wildlife

People who are infected with RMSF generally start getting sick 2—14 days after exposure. Sick people will have flu-like symptoms that last 2-4 weeks.

ACCT Philly

Wash your hands before and after handling fish to reduce the risk of edwardsiellosis.
