Sensitivity Analysis The results of DCF analysis are only as reliable as the assumptions on which it is based. Choose from online courses, open courses or in-company training — all designed to make a real difference to your day-to-day work.

What is investment appraisal? why a business need to appraise investment

Corporate objectives may overtake financial figures and information. By definition, non-financial factors cannot be taken into account when doing payback periods, average rates of return and net present values. Prentice Hall, Englewood Cliffs, NJ, pp.

Finance for Non

How quickly will the project pay for itself? What is the payback period for the project? This then allows managers to assess the level of value they are generating for shareholders. Among these, the balance scorecard, real option analysis, value chain analysis, benchmarking and technology roadmapping are of vital importance Kaplan and Norton, 2001; Hoque, 2001; McCarthy, 2003; MacDougall and Pike, 2003. Our practical, engaging financial training courses are designed specifically for non-financial management and business professionals.

Online Finance for Non

It explains which investment opportunity to consider and how to calculate return and risk.

Investment appraisal

It is complex and difficult to calculate manually, as it is a trial and error method.
