Why African businesses should move beyond coping with COVID

Moreover, stress is documented to be associated with poor quality of life and severe physical symptoms of HIV, disease progression, low CD4 count, development of AIDS and increased risk of death among PLWH.

12 strategies for moving from water

Filesize: 12.55 MB

scarcity to abundance

Although public boreholes were available, they were found at an average of only two in a given residential area, regardless of its population.

12 strategies for moving from water scarcity to abundance

Narsiah, S 2007 Alternatives to neoliberal governmentality in South Africa, South African Geographic Journal, 89 1, 34-43. Where there is no male income earner, negative consequences on overall income are often suffered by the household since women often times lack the ability to command labor within and outside the household.

12 strategies for moving from water scarcity to abundance

Study sample selection From all villages within three subcounties directly bordering LMNP, three were randomly selected using a random number generator Microsoft Excel Basic 2003, Redmond, Washington. Climate change estimates for sub-Saharan Africa vary by region, with differing estimates of freshwater availability into the next decades.

Famine and household coping strategies

So another crucially important step towards solving the problem of fuel scarcity in Nigeria involves taking adequate measures to make sure our refineries start working again! This research recommends that youth should engage in profitable activities such as acquiring soft skills and expertise while still searching for jobs rather than sitting idle home.

12 strategies for moving from water scarcity to abundance

Certainly, the relations between these social identities involve economic livelihood activities and water usage , such as selling milk and maize, and personal relationships, such as marriage and friendship.

Civil Society and Residents' Coping Strategies with Water Shortages and Household Food Insecurity in Gweru, Zimbabwe

Demographic data were collected for each acting head of household, including age, sex, ethnicity, education, primary livelihood, and self-reported wealth using a Likert-type scale. Inefficient Policies and Corruption Food insecurity has persisted in Nigeria and many developing countries because of inefficient policies especially with respect to agriculture, trade, economics and other adjoining sectors. Scores obtained by each participant in all the 25 items are summed.
