Public social policy development and implementation: a case study of the Ghana National Health Insurance scheme

Lack of contingency planning to meet emergencies or unanticipated delays g. This article begins by outlining some of the challenges facing rural health around the world before reviewing the Health for All target, reflecting on its non-achievement and on the potential role of family practice. The lack of quantitative data to provide an objective measure of data quality is yet another limitation to this assessment.

Public health

WHO 2008 PATH carefully weighs opportunities for integration in the places we work, knowing that integration is not always the best approach. Despite this effort by stakeholders, job security still remained a concern.

Global Health

Others do not need to make the same mistakes.

Prepared to react? Assessing the functional capacity of the primary health care system in rural Orissa, India to respond to the devastating flood of September 2008

Expenditure ceilings imposed on poor countries must be lifted to achieve the Millennium Development Goals. All MHO that were not district-wide government-sponsored public were classified as private. .

Strengthening monitoring and evaluation (M&E) and building sustainable health information systems in resource limited countries: lessons learned from an M&E task

Each conference has been much more than just an International Conference.

Prepared to react? Assessing the functional capacity of the primary health care system in rural Orissa, India to respond to the devastating flood of September 2008

The specifics differ from country to country; however, there are always some illnesses which are peculiar to living and working in rural areas.
