## Mine Reclamation and Enforcement

Discharge at SBC-2 was estimated using an empirical relationship see methods between discharge measured at SBC-2 and discharge measured at the USGS Soda Butte Creek gage USGS 06187915 located at the Yellowstone National Park boundary SBC-4.

## Evaluation of the effects of coal

See following text for caption Key Gray: Not Sampled White: Meets Standard Red: Exceeds Standard Figure 7. Metal Mining and the Environment, p. The reclaimed lands now support a vibrant ungulate population and increasing diversity of species as the vegetation matures.

## Evaluation of the effects of coal

Teck is also a Platinum sponsor of the KTS to ensure that these trails are kept safe and fun for years to come. Rachel Carson State Office Building P.

## Mine reclamation

Description: -

1 microfiche ; 11 x 15 cm

This edition was published in 1979

Yellowstone National Park, Mammoth, Wyoming, USA. Typically about 10-20 contamination complaints are investigated annually by RRC field personnel. Approximately 5 ounces 150 ml of material was collected at the water-sediment interface from three locations 0.

## Mine Reclamation and Enforcement

During these reviews, it became apparent to Spectrum that the mining method profoundly affected the reclamation costs. Our overarching goal of this work was to assess the water quality during the initial phase of recovery and post-reclamation. National Park Service, Freshwater Workgroup Subcommittee, Fort Collins, Colorado, USA.

## Can we mitigate environmental impacts from mining?

While Tom worked on mine clean-ups across Montana, he always remarked that his work on Soda Butte Creek was the highlight of his career. To combat this problem, the MDTI was formed as a partnership of technical experts from industry, state and federal agencies and academia who have joined together to combat AMD and related water-quality problems from mining and seek solutions to them.

## Mine Reclamation

The mine grew with the City of Kimberley, named in the hope that it would be as rich as the diamond mines in Kimberley, South Africa.
