Performances and Sessions — Music and the Mind

NMW: Not in the sense that a particular chunk of brain is musical.

What Happens in the Brain When We Make Music Together

They stand aloof and strange to each other. To date, most work has been done with Western-style compositions, and the well structured music of Mozart and Bach has been a popular basis for interventions. He continued adding beams along the remaining vector of his life.

Music and the brain: the neuroscience of music and musical appreciation

Music can be a source of comfort for those who find themselves alone, but do not wish to be so 111.

Music and the brain: the neuroscience of music and musical appreciation

Two features of our world which are universal and arguably have been a feature of an earlier evolutionary development are our ability to create and respond to music, and to dance to the beat of time. If we erase the air and slow the sound of a struck tuning fork in it, it would make two sets of waves interlocking the invisibility in opposite directions. Most of us have, at times, felt moved or comforted by music, but scientists are now discovering that music can teach us a lot about the brain itself.
