Early Childhood Educator Strategies for Cerebral Palsy

Am J Speech Lang Pathol 2009; 18: 361—375.

Eating and Drinking Ability Classification System

The Eating and Drinking Ability Classification System in a population-based sample of preschool children with cerebral palsy.

Eating and Drinking Ability Classification System (EDACS)

A rating addendum would be a useful contribution to the tool to enhance reproducibility.

Eating and Feeding

Multiple regression analysis was performed. .

Reliability, construct validity and usability of the Eating and Drinking Ability Classification System (EDACS) among Dutch children with Cerebral Palsy

Daily Playtime Playtime is extremely important for children with cerebral palsy and should always be incorporated into their daily schedule. For example, thicker pencils and paintbrushes may be better for grip, and including dance movements that are seated or possible using a walking frame would make these activities more accessible to students with cerebral palsy.

Dietary Needs for Kids With Cerebral Palsy (for Parents)

Children and young people who have ongoing difficulties with eating and drinking, or who get regular chest infections, should be seen by a team that specialises in treating swallowing problems. A healthy diet It is important that your child gets enough nourishment from their diet.
