

# Composite technology - proceedings of the Fifth Annual Conference on Materials Technology, April 14-15, 1988

## The Center - Computational Modeling of Damage Development in Composite Laminates Subjected to Transverse Dynamic Loading

Description: -

-  
Composite materials -- Congresses. Composite technology - proceedings of the Fifth Annual Conference on Materials Technology, April 14-15, 1988

- Composite technology - proceedings of the Fifth Annual Conference on Materials Technology, April 14-15, 1988

Notes: Includes bibliographical references.

This edition was published in 1988

Filesize: 68.22 MB

### Frank Pfenning / Publications

The applications examined include large patrol boats, hovercraft, minecountermeasure vessels and corvettes that are built completely of composite material.

### Review of advanced composite structures for naval ships and submarines

Atlanta, GA: Lawrence Erlbaum Associates. They enable members to share expertise, discovery and best practices. Greene; Dan Jurafsky; Christopher Potts; and Lauri Karttunen.

### 12th International Conference on Composite Science and Technology

Leiserson In the Proceedings of the 12th Workshop on Job Scheduling Strategies for Parallel Processing JSSPP June, 2006 Download the paper: by Bradley C. AAAI Fall Symposium on Intelligent Narrative Technologies, Arlington, VA. Verifications are coherently performed by conducting several benchmark test cases with exact analytical solutions, first for structures and then for fluid-structure systems.

Proceedings of the American Association for Artificial Intelligence AAAI-88, St. Goode 2008 The Structural Engineer Goode, C.

### Articles

### **Supertech Paper Listing**

While composites are now being considered for a diverse range of naval applications, for many years these materials were used only in a few non-critical ship structures and in small boats.

### **ICCMME**

Maruno , Proceedings of Processing and fabrication of advanced materials 6 PFAM VI , Singapore, Vol2, 1693-1701, 1997. Comparatively, no interfacial detachment occurs under the low stress regime, where the displacement—force curve is plotted and used to quantify the energy barrier to the onset of creep failure.
