Just as giving away money seems counterintuitive, so does giving away food. The terrain in the research site is quite hilly in places, seasonally floods in others, and the climate is often hot, humid, and rainy — this is a rainforest just south of the Equator in which 3 to 4 meters of rain falls a year — thus persistence, maturity, dedication, good humor, and an excellent work ethic are extremely important. The gorilla population in Kahuzi-Biega National Park, in Democratic Republic of Congo DRC, is estimated to have declined 87% since 1994 Schwitzer et al.

Behavioral ecology

Finally, we note that there has been a recent increase in interest in measuring natural selection directly in contemporary human populations ; ; ; . Because male chimpanzees cannot keep others from mating with females, producing greater quantities of sperm is perhaps their best way to ensure paternity. Animal behavior is the scientific study of everything animals do, whether the animals are single-celled organisms, invertebrates, fish, amphibians, reptiles, birds, or mammals.
