Journal of the Acoustical Society of America, 87 4 :1738{1752, 1990. The suitability of the decision model for evaluating the appropriateness and sustainability of a technology for use in a developing economy was illustrated by using it to assess the comparative sustainability of three fish smoking kilns. At the graduate level he has taught courses on Continuum Mechanics, Elasticity, Plasticity, Advanced Finite Element Analysis, Fracture Mechanics and Elastic Wave Propagation in Solids.

Each set of juxtaposed inlet lamina and outlet lamina forms a single heat exchange unit. Eigenvectors are computed for these matrices.
