Building this flood control and power generating system employed thousands of workers, which helped bring needed dollars to the local populace. These solutions require cooperation among governments and international institutions; combine hard power with soft power into smart power. Former President Hoover backed Landon in vigorously opposing the New Deal programs, which the League characterized as wasteful, radical, and hopelessly muddled.

This new development has caused to grasp the essence of these new changes, especially when the Pivot was announced by President Obama in 2011.

Making Complexity Your Friend: Reframing Social Theory for the Anthropocene in: Weather, Climate, and Society Volume 9 Issue 4 (2017)

Ecological anthropologist Emile Moran argues that the discovery that complexity exists even in simple systems poses a challenge to biologists since it implies that evolution is not the only source of order.

Rule(s) over regulation: the making of water reforms and regulatory cultures in Maharashtra, India.

For example, how complexity is defined for any system depends on the framework used for observation.
