## Edutopia

By Japanese law, first-year teachers receive at least twenty days of inservice training and sixty days of professional development. The book offers multiple, well-developed rationales for why school outreach and partnerships are important including relevant statistics on schools, students, and families pulled from a variety of sources. With the infrastructure in place, not only could GSU uncover the greatest obstacles to student success, and launch programs to address them, it could also continually test new approaches.

## School

According to the Federal Reserve Bank of New York, defaults are most common among students with the lowest debt burdens. The authors examined the student achievement data of each school included in the turnaround initiatives—and in LPS, each traditional public school in the district—to select schools that have made notable academic gains since implementing these practices. Partners perform a number of important roles: They offer programming, provide in-kind services, and provide paid and volunteer staffing see Table 1.

## Family

While 87 percent of high school students surveyed by YouthTruth said they wanted to go to college, only 45 percent felt ready to succeed there.

## A Guide for Engaging ELL Families: Twenty Strategies for School Leaders

What resources would they bring to the table? LPS pursued a districtwide turnaround that focused on improving schools within the existing structure, but nonetheless employed the high-performing charter best practices. Effective teachers of culturally diverse students acknowledge both individual and cultural differences enthusiastically and identify these differences in a positive manner. At UTEP, staff at the ECHS Academic Success Center provide advice about majors, financial aid, and other areas of interest.

## How to Build Strategic Partnerships

Creating a profession of teaching in which teachers have the opportunity for continual learning is the likeliest way to inspire greater achievement for children, especially those for whom education is the only pathway to survival and success. Master teachers are released from their classrooms to advise and counsel them. The book also offers a variety of web resources to help educational leaders learn more about different approaches to and resources for diverse partnerships.

For example, before some students can begin a task, they need time to prepare or attend to details. This organization also hosts virtual career fairs that connect employers with job seekers. This transition is also a time when children begin to take part in an increasing number of learning settings, both in and out of school.
