NBE

Diagnosis can be expedited by key physical examination, electrocardiogram, and sonographic findings. Coronary ischaemia is caused by a mismatch between supply coronary blood flow and demand myocardial oxygen consumption as workload increases.

RACGP

If you are unable to exercise, a pharmacological medication stress test will be arranged that mimics the heart's response to increasing levels of exercise.

Mayo Clinic

Obtaining views from the left parasternal, apical, subcostal, and suprasternal notch windows is mandatory for a complete echocardiography protocol.

Pulmonary Hypertension Echocardiography • LITFL • CCC

If these clinical guidelines are inconsistent with the terms of the individual's specific coverage plan, then the terms of the individual's coverage plan always takes precedence.
