He invited all research staff to a meeting in his office at which they stated their needs. The critical questions about acquiring these skills through laboratory experiences may not be whether laboratory experiences help students learn them, but how the experiences can be constructed so as to be most effective in teaching such skills.

Atomichron: The Atomic Clock from Concept to Commercial Product

The idea of utilizing continuous phase shifters for the purpose of making controllable changes in the frequency or indicated time in a standard time

and frequency system was first disclosed in a comprehensive patent filed in 1934 and issued to Warren A. This remains a shame on the British government and British history.
