**Well slot: Active wells and completions**

### in Westwood report to month end

Hydrogen is a low-carbon energy source which could replace fossil fuels in power generation, heating and transportation. US and the Gulf of Mexico The number of active drilling rigs in the lower 48 states of the US, excluding the Gulf of Mexico, stood at 753 in February. The Johan Sverdrup field has been electrified by means of power from land, helping ensure record-low emissions from production.

### Exploration drilling activity expected to recover in 2021, says Westwood Global

Here, we explain the many initiatives we are undertaking in electrification. Rhum is expected to access recoverable reserves of 800 billion cubic feet of gas 23 billion cubic metres. .

### UK Continental Shelf Oil Well Records by Great Britain

To date, three well programmes have completed in 2018. In 2008, the combined production of oil and gas was 1 billion BOE 549 million barrels 87,300,000 m<sup>3</sup> of oil and 68 billion of gas. Westwood has put the dip down to operators deferring maintenance work, including the planned Forties shutdown.

### UK Continental Shelf Oil Well Records (Paperback, 28th phase): Great Britain: 9780114130442

Oil and gas are also major feedstocks for the petrochemicals industries producing pharmaceuticals, plastics, cosmetics and domestic appliances.
