Digestive Issues: What's Normal and What to Worry About

This happens because your gut sends the signal to your brain of being physically full, but the nervous system still sends a signal that there is a need for more food to restore the complete energy balance. Many people take it as a first food in the morning and many athletes take it as an energy booster drink. Okay, maybe this is a poor analogy, but hopefully you get the point.

10 Steps to Stronger Digestion

This process slowly squeezes food from the upper esophagus all the way down into the stomach.

9 Signs That Your Body Might Not Be Properly Digesting Meat

If you have never paid much attention to it before, now is the time to start.

Why Your Digestive System Doesn't Function Properly and How to Fix It

It extends from the mouth to the rectum and anal canal.
