Using physical education to promote out

The accelerometry data will be included only for those participants who have provided valid accelerometer data for a minimum of 3 days.

Using physical education to promote out

What teachers say and do to support students' autonomy during a learning activity. Students with existing physical or mental health condition that prevents participation in PE lessons, regular physical activity or completing surveys will be excluded. The proposed participant flow diagram through the trial is presented in Fig.

Using physical education to promote out

With regards to more severe misbehaviour i. Randomization will be conducted by a researcher independent of the core research team using a random number generator.

Using physical education to promote out

What is a practical activity? Effects of the intervention on study outcomes can be interpreted at the student level after controlling for school- and class-level effects.

Behaviour Management in Physical Education

Whilst others prefer a more relational approach such as restorative justice meetings where the pupils involved discuss the situation in more detail in an effort to resolve the issue and prevent reoffending. The analysis indicated that a student sample size of 286 is required to detect the effect size based on model fit.

Safety in practical lessons

Intervention Autonomy support intervention group Teachers in schools allocated to the intervention condition will receive the twelve-hour interactive autonomy support teacher-training program developed specifically for this study.

Using physical education to promote out

The project team is advised by a steering group comprising the core research team and stakeholders.
