No gender equality without sexual and reproductive health and rights says IPPF report

Safia Khairuddin, Pakistan 22209 Effects of practice of Ramadan's fast on the treatment of genital discharge with Erythromycin tablets, on Yaounde's sexually transmitted diseases's STD's clinic's attenders Gislaine Marie B. Rezza, Italy 23535 Environmental factors in injection-related HIV risk in female commercial sex workers from Two U.

Engaging men in sexual and reproductive health and rights, including family planning: Why using a gender lens matters (v1.3.1)

These are generated from peerreviewed abstracts, which cover a wide variety of research topics. There may be regional or national differences in how gender is expressed; more important, there are many different contexts within any one country. Actions are recommended to ...increase the participation and sharing of responsibility of men in the actual practice of family planning.

Feminism and the sexual and reproductive rights of women and girls

Yogev, USA 174 How often can signs, symptoms and immunological 12169 abnormalities predict perinatal HIV-infection in Brazilian infants?
Example of a gender-transformative program: A condom campaign which promotes gender-equal relationships with shared decision-making and respect along with discussion around sexual and reproductive health and fertility intentions Why is this gender-transformative? Mukasa Monico; C Watera, Uganda 22154 How likely are TB patients to be accurately diagnosed in urban health centres in Lusaka, Zambia? Begin to ensure that providers feel comfortable counselling clients of any sexual orientation.

PERSPECTIVES ON DEVELOPMENT

Gender-sensitive programming can be an effective framework to use when engaging men and boys in SRH services. Gray, USA 23404 Patterns of condom use reported by HIV-infected and at-risk women at three time periods Jan Moore; E.
