Is a debt crisis looming in Africa?

Challenge 3 Leadership and Management commitment The Leadership and Management challenge has a huge impact on integrating and aligning a management system to deliver a comprehensive performance management system.

Innovation in Africa

There are parallels between the and the Heavily Indebted Poor Countries HIPC initiative period that proffer solutions to prevent another crisis. Diagnosing leadership development needs, especially in Africa, requires an assessment of the entire leadership culture.

Leadership Style and Qualities in Africa: A Literature Review

The application of quantum physics principles on computing will have huge implications on operating systems, cyber security, big data, block chains and others applications.

Africa Review Report on Waste Management

Climate change has also adversely affected many countries in Africa and compromised their ability to feed their people.

5 serious waste issues in Africa

These people understood the mindset of the elites and put it in books for everyone, including African leaders to read, understand and apply.

Approaches to project management in Africa: implications for international development projects

This has practical implications for policy-makers. Three and a half decades of growth were predicated on a few fundamental factors: market-oriented institutional reforms, low wages, and a large working-age population.

Management problems in Africa (1986 edition)

Like many African nations, Norway discovered and took advantage a great deal of natural resource wealth. In this sense, riparian zones can serve as critical parts of green infrastructure for purposes such as protection from floods, provision of recreational spaces, and cleaning water while safeguarding biodiversity.
