Corporate governance and earnings management in Malaysian government linked companies: The impact of GLCs' transformation policy

In this quantitative study, SMART PLS was employed for analysis.

Perceived corporate entrepreneurship in GLCs: evidence from Malaysia

We assess the association between CEO duality, board size and firm performance of top 200 companies listed on the Vietnam Stock Exchange VSE over 20142015. Top three priority drivers are being derived. It further examined whether demographic factors moderate the effect of EI on TC.

BUILDING A SUSTAINABLE FUTURE

Socially responsible business practices have raised local business profiles that put them on a par with their international counterparts. This study applied event study methodology and analysed 55 CBAs that happened in 24 foreign markets by 27 Indian pharmaceutical firms, from the year 2005 to 2018. The model sensitivity to some of the parameters is discussed later.

8. The Discussion

Further, evidence was also found for the direct and significant effects of PQ, BA, and BT on BL, as well as for a direct and significant effect of BA on PQ and BT.
