A DNA barcoding is a taxonomy method that provide fast and acurate species identification, thus it can be applied to anticipate when a species can not be identified morphologically. Authors: Husson et al Abstract: Cyclostratigraphic analysis of the Maastrichtian limestone-marl alternations of Bidart SW France allows the hypothesis of orbital control on lithological cycles to be evaluated. The opportunities to distort information if there is a perceived advantage are rife.

FOFOA: Greece is the Word

So, let's assume your bottle is filled with air. But two weeks ago on my most recent visit to Beirut, I did not feel any fear at all, in spite of the riots, meaning that I am confident now that the idea can live without me—perhaps even better without me, as my ego might get in its way on the occasion. Assuming the graph you referred to and your interpretation of it are correct, then, apparently, since the ENSO process is primarily an equatorial process and the SOI is off equatorial, then the SOI data is picking up extraneous off-equatorial noise that is not associated with the process of ENSO.
