Hergenhahn's An Introduction to the History of Psychology

Yonder puny fellow, however, whom every one can beat, suffers no chagrin about it, for he has long ago abandoned the attempt to 'carry that line,' as the merchants say, of self at all. There is no other identity than this in the 'stream' of subjective consciousness which we described in the last chapter.

Reflections On The Principles Of Psychology

Psychology evolved out of coalescence of natural science, and also the branch of philosophy which is known as epistemology, which is also known in the theory of knowledge. Is it the inner nucleus of my spiritual self, that collection of obscurely felt 'adjustments,' plus perhaps that still more obscurely perceived subjectivity as such, of which we recently spoke? And the quick-witted reader probably noticed at the time, in hearing how one constituent was let drop and disowned and another one held fast to and espoused, that the phrase was meaningless unless the constituents were objects in the hands of something else.

It looks within human thought processing and human behavior as a whole rather than separately. The way in which the present Thought appropriates the past is a real way, so long as no other owner appropriates it in a more real way, and so long as the Thought has no grounds for repudiating it stronger than those which lead to its appropriation.
