#### Japan's plan to increase catch of bluefin tuna in 2020 rejected by fisheries commission

Between 1970 and 1978, the catches of principal market tunas increased significantly as a result of the expansion of fisheries in the eastern Atlantic and the development of new offshore fishing grounds in the eastern Pacific. Fishers tend to have little incentive to practice conservation, for they know that if they do not catch the available fish, someone else probably will.
