Spinal Cord Stimulators and Pain Pumps: Implantable Systems for Neuropathy

A steady regimen of exercise may therefore help manage pain better than many other drugs.

Neurotransmitters: What they are, functions, and psychology

Spontaneous and evoked pain were measured 48 hours before, during, and after treatment. Today we are joined by Certified Clinical Nutritionist, Beverly Meyer to discuss the role of neurotransmitters in pain perception. Ultrasound imaging uses high-frequency sound waves to obtain images inside the body.

Neurotransmitters: What they are, functions, and psychology

Other GABA-boosting supplements include magnesium, I-theanine, and kava.

Nerotransmiter Implanted In Back For Pain Control

Messages are sent through the nervous system by means of electrical and chemical signals.
