## American Upper Ordovician standard - II. Development of stratigraphic classification of Ordovician rocks in the Cincinnati region

- - The new chronostratigraphic classification of the Ordovician System and its relations to major regional series and stages and to  $\delta$  13 C chemostratigraphy, Lethaia

Description: -

Geology, Stratigraphic -- Ordovician

Geology -- NomenclatureAmerican Upper Ordovician standard - II. Development of stratigraphic classification of Ordovician rocks in the Cincinnati region

Information circular (Ohio. Division of Geological Survey) -- no. 26 Information circular / State of Ohio, Division of Geological Survey -- no. 26American Upper Ordovician standard - II. Development of stratigraphic classification of Ordovician rocks in the Cincinnati region Notes: Pt. I is in the Journal of paleontology, v. 33, no. 6, 1959, p. 1029-1068 and Pt. III is in the Journal of paleontology, v. 34, no. 2, 1960, p. 237-294

Revised sequence stratigraphy of the upper Katian Stage (Cincinnatian) strata in the Cincinnati Arch reference area: Geological and paleontological implications

It is usually called the Chingiz-Tarbagatai Arc Dobretsov 2003. This interval shows evidence for progradation and most likely represents the RST interval. The Logana was deposited during the culmination of the initial transgression of Lexington time.

The American Upper Ordovician Standard: XIII A Revised Time

Using epoxy casting to investigate microborings in ancient hard substrate communities.

Fossils and Geology of Lanark County, Ontario: Phenocrysts in a Bed of Porphyritic Volcanic Rock in the Ordovician Sedimentary Rocks of the Ottawa Embayment, Eastern Ontario

Most of this limestone is nearly free of quartz silt and clay, but some limestone, particularly where nodular bedded, contains considerable amounts of these impurities. It is underlain and overlain by calcarenite of the Tanglewood Limestone Member, and it grades in all directions into the Tanglewood.

Ordovician Sequence Stratigraphy of the Siberian and Russian Platforms

In particular, my specialty is trilobites of Cambrian and Ordovician age and their utility for correlation and paleogeographic reconstruction.
