California Maps & Facts

Regional Maps: Outline Map of California The above blank map represents the State of California, located in the western Pacific region of the United States. Geochemical indices and regression tree models for estimation of ambient background concentrations of copper, chromium, nickel and zinc in soil.

Geophysical study of the Clear Lake region, California: Chapman, Rodger H. (Rodger Hale), 1925

Gravity data were jointly modeled with existing magnetic data along a two-dimensional profile aligned with an existing geologic cross-section. Environmental Monitoring and Assessment 2010, 171 1-4, 395-410.

Isotopic and geophysical constraints on the structure and evolution of the Clear Lake volcanic system

Very few of these datasets have been updated as methods and technology have greatly improved. Heavy metal concentrations in sediments from Xingyun lake, southwestern China: implications for environmental changes and human activities. Volcanism has moved progressively northward within the volcanic field following an early phase when predominantly basaltic andesite lava erupted over a wide area.

California Maps & Facts

A mineralogical and geochemical investigation of modern aeolian sands near Tonopah, Nevada: Sources and environmental implications.

Geophysical characterization of the Northwest Geysers geothermal field, California

Additionally, a secondary obsidian hydration study was undertaken including the artifacts that were originally submitted for obsidian hydration in 1984. Lean, Laurier Poissant, Jules M. Low permeability, high thermal gradients, and low steam saturation prescribed development of an enhanced geothermal system EGS in the Northwest Geysers to increase energy producing capacity.
